Media Production and Third-Party Creative Brief

Media 1: Brand Purpose

Media ID: ABOUT-M01

Placement: Section 1 — About Hero

Primary format: Short brand-purpose animation

Alternative: Static student-centred ecosystem illustration

Suggested duration: 8–12 seconds

Objective

Show the student at the centre, supported by teachers and institutions, with academic intelligence connecting learning evidence and next actions.

Required visual hierarchy

1. Student
2. Teacher
3. Institution
4. Learning evidence
5. Recommended support or next action

Important restriction

AI must not visually replace or overshadow the teacher.

Media 2: Disconnected to Connected

Media ID: ABOUT-M02

Placement: Section 2 — Why Classess® Exists

Primary format: Academic information-flow animation

Alternative: Before-and-after illustration

Suggested duration: 10–15 seconds

Objective

Show disconnected lesson plans, assessments, reports, feedback, and student activity becoming one connected academic journey.

Suggested sequence

Disconnected information → Connected learning profile → Clear insight → Recommended action

Important restriction

Do not portray existing institutions or teachers negatively.

Media 3: First-Principles Framework

Media ID: ABOUT-M03

Placement: Section 3 — Built from First Principles

Primary format: Four-principle animation

Alternative: Four-card illustration

Suggested duration: 8–12 seconds

Required principles

- Student-centred
- Teacher-empowered
- Institution-aware
- Outcome-oriented

Objective

Demonstrate that every product and workflow is built around these four principles.

Media 4: Student-Centred Ecosystem

Media ID: ABOUT-M04

Placement: Section 4 — Student at the Centre

Primary format: Circular relationship animation

Alternative: Static ecosystem illustration

Suggested duration: 8–12 seconds

Visual structure

- Student in the centre
- Teacher closest to the student

- Institution surrounding the learning system
- Parent or authorised supporter connected appropriately
- Classess® linking information and action

Important restriction

Do not show AI as the central authority.

Media 5: Academic Intelligence Layers

Media ID: ABOUT-M05

Placement: Section 5 — From Software to Academic Intelligence

Primary format: Layer-building animation

Alternative: Six-layer diagram

Suggested duration: 10–15 seconds

Required layers

Software → Data → Intelligence → Workflow Support → Institutional Knowledge → Better Outcomes

Objective

Show that value increases as academic information becomes connected and actionable.

Important restriction

Keep the visual understandable to a non-technical audience.

Media 6: Responsible AI Workflow

Media ID: ABOUT-M06

Placement: Section 6 — Responsible AI

Primary format: Human-controlled AI workflow animation

Alternative: Responsible AI framework illustration

Suggested duration: 10–15 seconds

Suggested sequence

1. Academic context
2. Permission and privacy check
3. Protected AI processing
4. Suggested output
5. Teacher or authorised review
6. Approved action

7. Audit record

Required review

The final visual must be reviewed by:

- Product team
 - Technical team
 - Privacy or governance team
 - Brand team
-

Media 7: Classess® Ecosystem

Media ID: ABOUT-M07

Placement: Section 7 — The Classess® Ecosystem

Primary format: Connected product-ecosystem animation

Alternative: Simple ecosystem map

Suggested duration: 10–15 seconds

Required grouping

Learning and Academic Intelligence

Classess®, Vidya, independent student, independent teacher, institution intelligence

Institution Operations and Engagement

Edmission, Feenance, Kaho.chat, PTM, SIS Vault

Content and Partnerships

Publisher, E-Content, Academic Consultant, School Blueprint, curriculum and assessment solutions

Important restriction

Do not give equal visual prominence to products that are not publicly launched.

Media 8: Future of Learning

Media ID: ABOUT-M08

Placement: Section 8 — Our Vision

Primary format: Short brand film or aspirational animation

Alternative: Static education illustration

Suggested duration: 15–30 seconds

Objective

Show a realistic future where students, teachers, and institutions receive clearer academic direction through responsible intelligence.

Recommended scenes

- Student understanding a difficult concept
- Teacher reviewing learning evidence
- Institution identifying a support priority
- Student receiving a relevant next step
- Improvement becoming visible over time

Representation

Include different:

- Student age groups
- Learning contexts
- Institution types
- Communities
- Devices and access environments

Important restriction

Avoid futuristic holograms, robots teaching classrooms, or unrealistic technology environments.

General Production Guidelines

1. Use the exact media IDs in every file name.
 2. Provide desktop and mobile versions.
 3. Provide poster images for every video.
 4. Provide reduced-motion alternatives.
 5. Deliver editable source files.
 6. Confirm full commercial usage rights.
 7. Use only approved brand assets.
 8. Do not include unsupported statistics or performance claims.
 9. Do not use real student information without written permission.
 10. Do not use third-party logos without approval.
 11. Keep academic examples accurate and reviewable.
 12. Avoid generic corporate stock imagery.
 13. Ensure all media supports the written message rather than repeating it word for word.
 14. Provide accessibility descriptions for every media asset.
 15. Obtain internal approval before public release.
